Database Development

Our Application

A simpler way to inspect a packaged product for its contents without the effort of manual entry.

Introducing Hare

Software & Design

Our Stack,
Our Architecture,
Implementation Notes

Software Stack

M

MongoDB

A NoSQL databasing client and server framework.

E

ExpressJS

A back-end framework for building web hosted NodeJS applications.

R

React

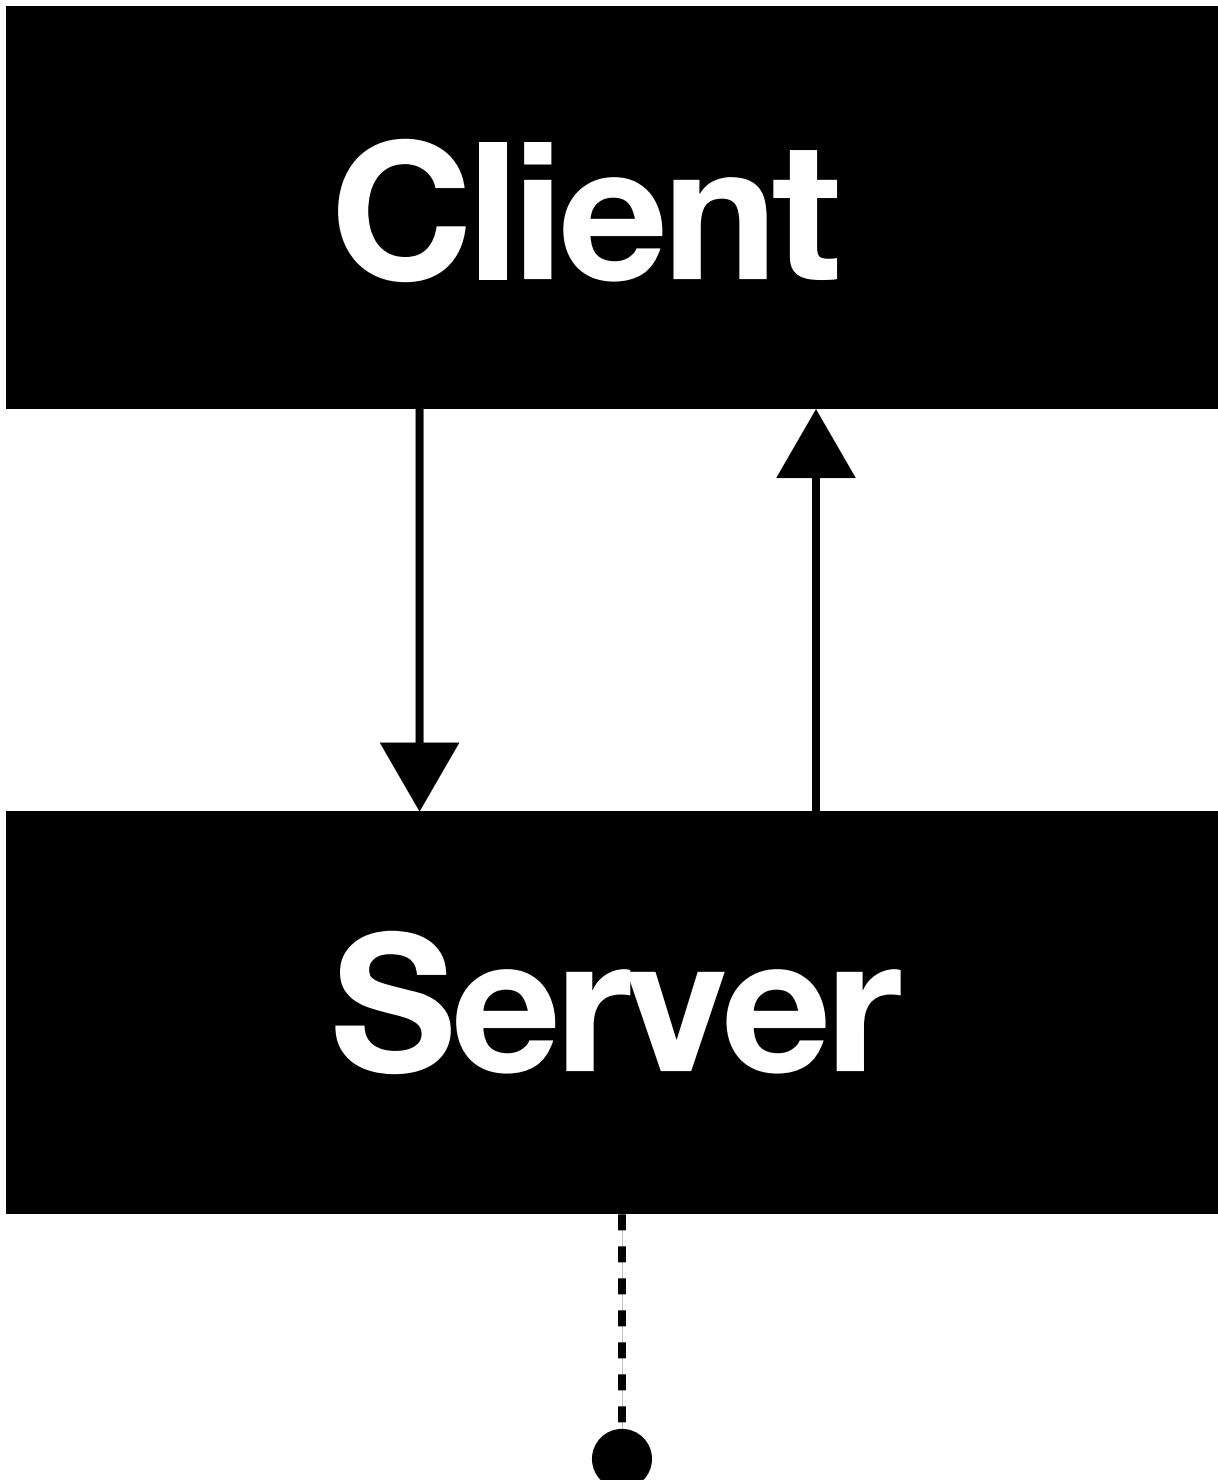

A front-end library used as a framework for Javascript.

N

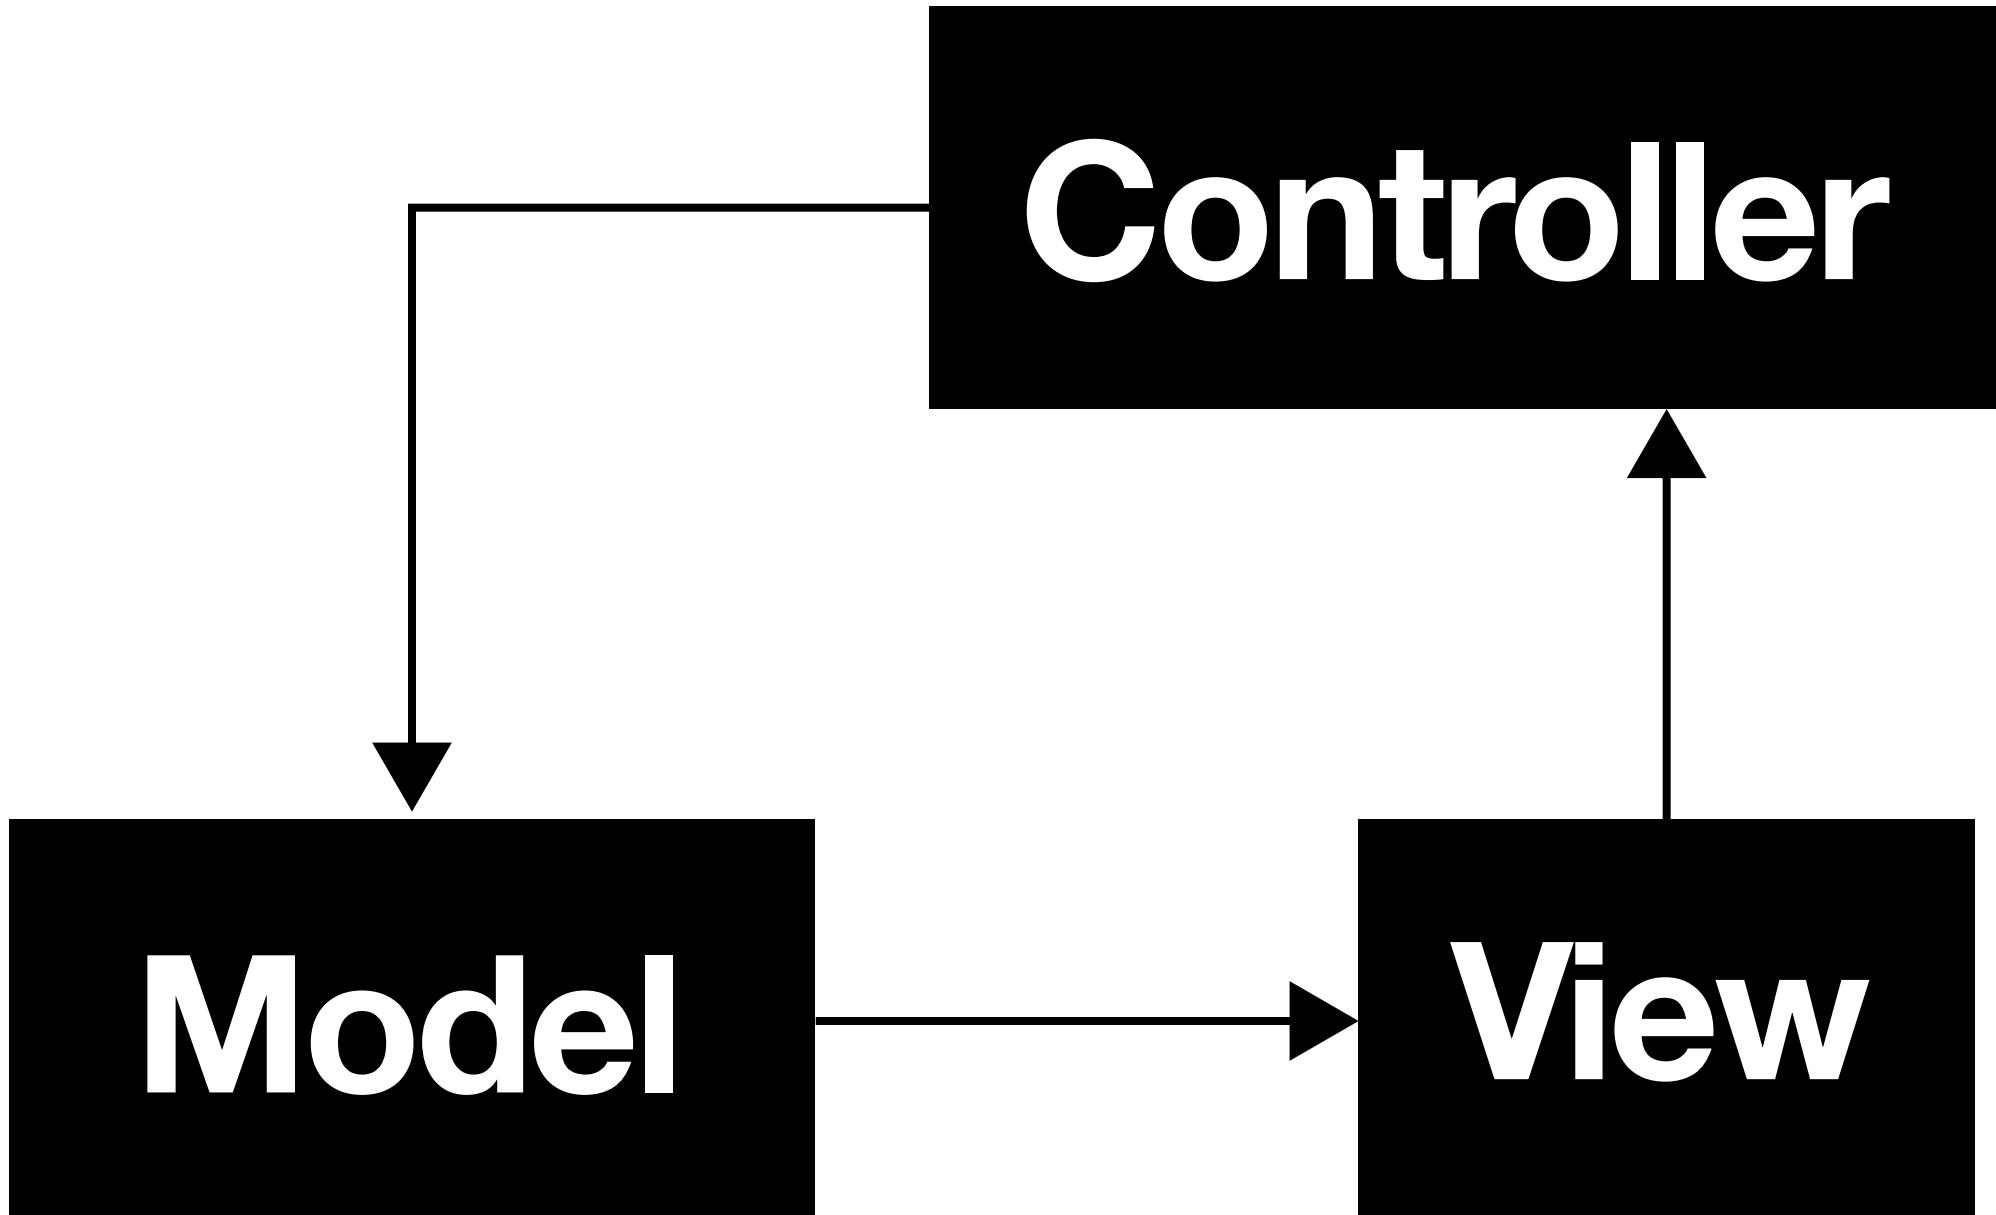

NodeJS

A runtime environment for Javascript out of the browser.

Architecture & MVC

vs

Demonstration

<http://localhost:3000>
<http://localhost:8000>

Modularity & Device Support

Decoupling the front-end components from the working state of the back-end (controller, model) allows for replacement and interchangeable clients to be developed. We plan to extend to:

Android devices, iOS devices, mobile Browser support and functionality.
